CIS 497 Senior Project

REACH OUT SOUTH

SPRING 2018

Melissa Smith
Instructor
University of South Alabama

Ashley Burns
Outreach Specialist
University of South Alabama

Jeffery Hollifield
Instructor
University of South Alabama

University of South Alabama
School of Computing

The SoC Outreach staff does not have an efficient way of collecting and maintaining student information. We will be creating a more efficient way to collect and maintain information on the student. SoC also wants to establish a connection with the students that have a potential interest in the School of Computing by sending more information and showing that they are interested in the student. An application/database will be used to collect, store, and modify student information, while also notifying the staff when to check on these potential students who have shown an interest in the SoC. It will also notify the student or staff when there in an upcoming event.

Tyree Bonner
ITE

My hobbies include playing video games,eating, and hanging out with friends

Ashley Gideon
ISC

I love to watch Hulu and make vlogs subscribe to my channel: Yellow Brick.

Brittany Eccles
ITE

I'm majoring in Information Technology with concentration in Web Development. I enjoy traveling, photography, dancing, going to concerts, and spending time with my friends and family.

Brittney Barber
ISC

My name is Brittney Barber and my major is Information Systems. I also graduate in May of 2018!

Put it on my TABB
